

EZ HAULING, INC AUTO CHECKLIST

At EZ Hauling, Inc. we want our customers to take a proactive approach in the shipping of the car, boat, etc. Please go through this checklist to help ensure an effective, damage-free transport.

- 1. Vehicle Washing:** By washing your vehicle, it will expedite the pickup. The transport driver will do a full inspection at pickup. Washing your car will allow you and the driver to see and notate properly any and all details of the unit on the inspection form.
- 2. Weather:** All units should be prepared to changing climates. Check all fluids such as coolant, transmission oils, etc. before shipping.
- 3. Fuel Level:** Fuel levels should be reduced to approximately 1/4 tank in your vehicle. This is mandatory for overseas shipping.
- 4. Antennas:** All antennas should be lowered or removed. Also, any temporary antennas such as a CB radio or cell phone. Transport insurance will not cover antennas that have not been properly secured.
- 5. Personal Effects:** Transport insurance does not cover any personal items in the vehicle. If you choose to place items in the car make sure they are secure to the trunk and no more than 100lbs. Please refer to the terms and conditions for a further detailed description.
- 6. Luggage, Bike and Ski Racks:** All non-permanent racks should be removed before transport. Remember, transport insurance covers only factory installed parts.
- 7. Truck Canopies and Caps/Car Bra's:** We ask that you properly secure any canopies or caps to the box of the truck to ensure safe delivery. Also, any car bra's must be removed due to the fact that wind can cause the bra to whip back and forth denting the front of your vehicle.
- 8. Keys and Keyless Entry:** We require that keys and any keyless entry devices be provided for your vehicle.
- 9. Alarms:** All alarms should be turned off. If there is any special feature on your car, please notify your driver at pickup. The driver nor EZ Hauling will not be responsible for any battery drained due to the fact that the alarm was not turned off. Please notate any special features on your order form under "additional comments."
- 10. Pickup and Delivery:** Make sure you have gone through the above steps. The driver will contact 12 to 24 hours in advance to pickup and deliver of your vehicle. Make sure you take a proactive approach to inspecting your car. We do not recommend you receive your car at night unless you are in a lighted area. Look under and on top of your car, not just around. Expect the car to be dirty depending on the duration of travel. Remember that once you signed off on the delivery receipt you have released the driver and his company of any further liability to your car, boat, etc.
